MOUNT ATHOS.

A TOWN WHERE NO BIRTH OR MARRIAGE EVER TAKES PLACE.

"Hagioion Oros," the holy mountain of all who profess the greek faith occupies a most remarkable position on the western shore of the Aegean Sea. It is isolated from the water to a height of 6,000 feet, and is the only one of long narrow peninsula, it seems to be kept in watch and ward over the sea path to and from Salona and the approach to the Dardanelles, much as Gibraltar does over the strait leading to the Mediterranean.

The peninsula is about forty miles long and has an average width of two miles. It is connected with the great Chalcidonian peninsula by a narrow neck of soil, through which the Persian marcher cut a canal for vessels of light draught, vessels of which still remain buried in the sand.

BEFORE the days of Christian Monks Athos had its recesses for the solemn grandeur of the great bare peak and the weird aspect of its surroundings are well calculated to harmonize with the gloomy and wild and mystic thoughts.
